「brackets」 Message

The Environment that allows free discussion without the interfering of the surrounding.

With the increase of open space concept, the aim is to encourage collaboration and interaction between workers. However, there is a lack profound research on how our daily message was not able to transmitted through based on the environments factor.

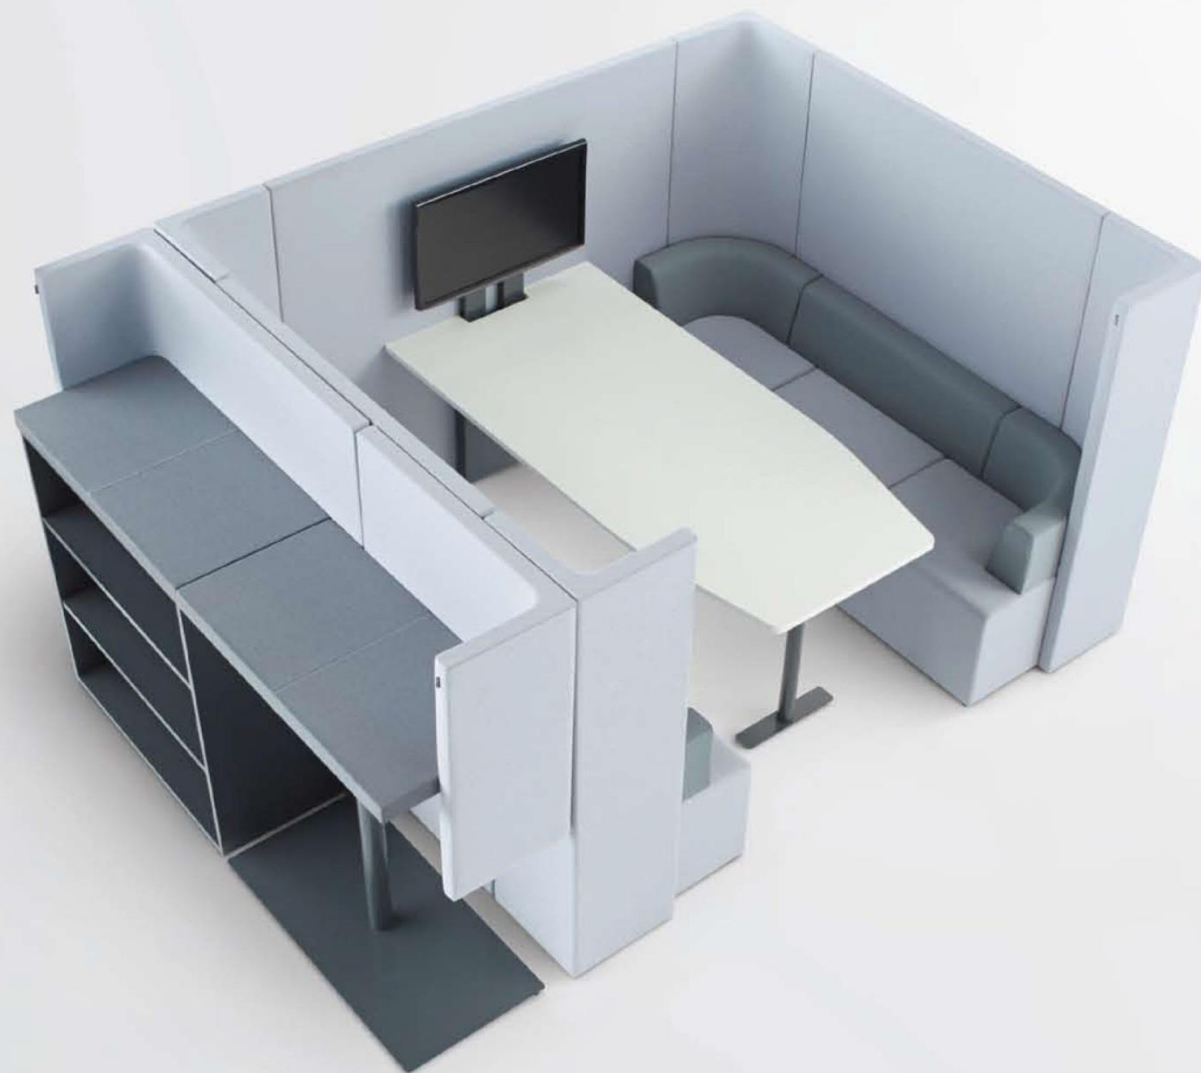

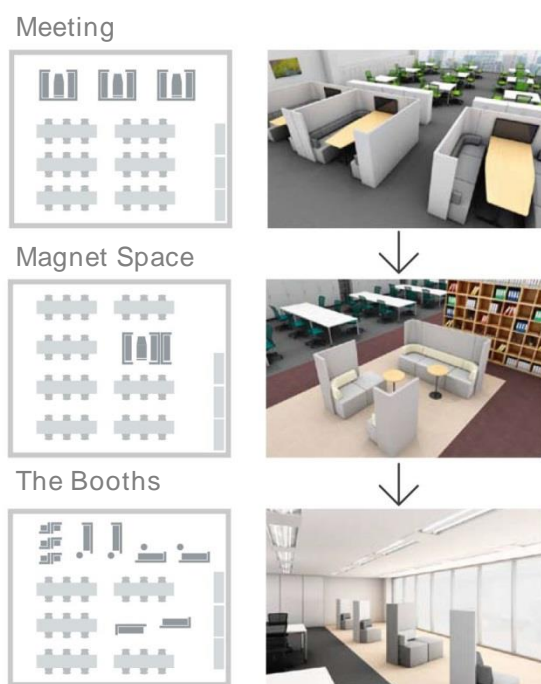

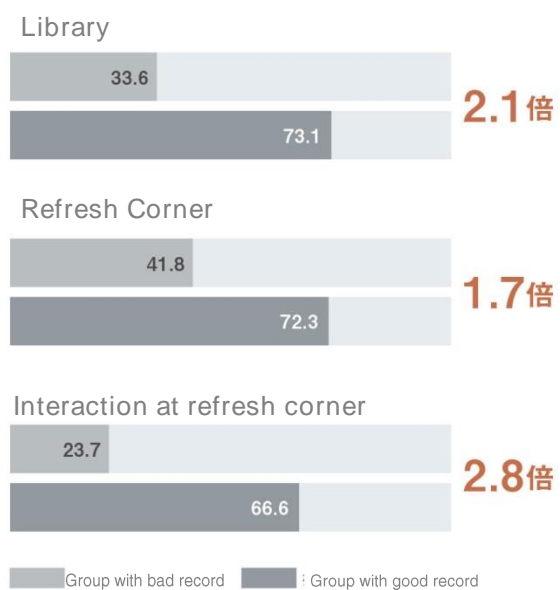

With the target of 300 workers who are involved in research and developments, it was discovered that these places where people could gather or take a break achieved more than what it was intent to be, they promote interaction and increase collaboration efforts.

Healing of open fatigue, improve the quality of discussion "Brackets".

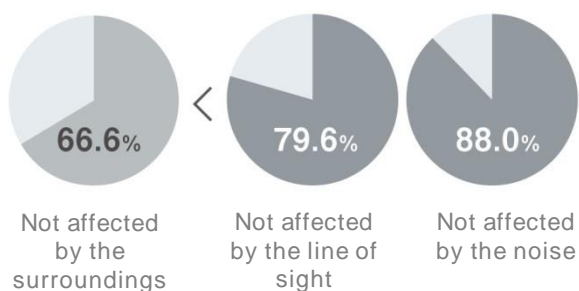

The Brackets has the capabilities of reduce unwanted noise from the surrounding. The panel is built in Sound-absorbing Urethane Ru. And the height Of the panel is 1400mm height as it gives you a wrapped up feeling thus enclosed and kept all the message within the cubicle.

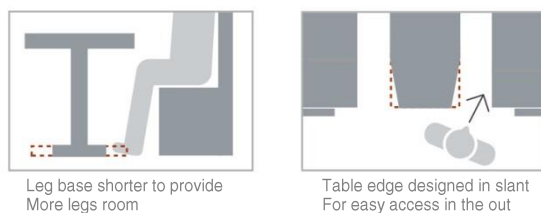

Brackets is flexible and can be configure according to the way you want it.

To create an ambient motion that look into prevent of unwanted noise and line of sight

To enhance the creativity of worker, ingenuity and attention to details. Brackets is designed to take into account of legs room, easy of getting out and in the cubicle.
