REFINE WORKMANSHIP

Interweaving three-dimensional elastic mesh helps dispersed heat and provides unparalleled comfort and support.

ERGONOMIC DESIGN

The curvy backrest gives a better support, and thus improve the sitting posture. Weighing just 4.1kg, it is easy to lift and stack on.

TECHNOLOGY

The polyester elastic mesh is hot melted to the frame of the chair, by doing so, it improves the stability and durability for many years to come.

DESIGN

Smart, versatile and minimalistic design. It comes with variations of chair types for different functions and usage.

MAXIMUM COMFORT, DURABILITY AND FLEXIBILITY.

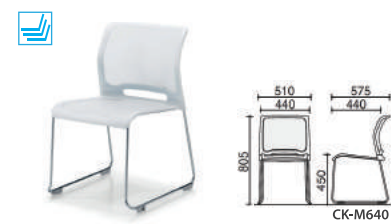

COMFORT HAS A NEW NAME.

Caravel is the breakthrough in minimalistic design for comfort and support, just like the Japanese's way; quality, assurance and sustainable.
The chair is also designed to be light-weight, that is easy to transport and stack-on effortlessly.

Caravel is the ideal choice for your office's environment.
